

PAQUES with offices in the Netherlands, China, Latin America, North America, India and Southeast Asia is worldwide a leading player in the development, production and sale of high-quality biological purification systems for (waste) water and gas. Paques solutions are used in a variety of industries and offer enormous added value such as reuse and saving of water, generation of green energy and the recovery of valuable raw materials. Paques helps its customers to contribute to the most important challenges of our time. With its mission 'revitalizing resources' Paques offers quality and the company strives for the right balance between People, Planet and Profit.

Within our inspiring BioBizzHub (BBH) we offer room for start-up companies, to scale-up their technology and go to market. A challenging step in the success of a company is translating a pilot/ demo unit into a full-scale product. Within the BioBizz hub we offer access to Paques' over 50 years of experience in scaling up technologies from lab to market and the global Paques sales network.

As a leading and reliable partner in the development and application of innovative biotechnology, we are always looking for well-educated and driven professionals that can strengthen our team. Currently, we have a vacancy for an enthusiastic
